ADDOMETER

The all round Figuring Machine.

The Addometer is a wonderful calculating machine contained in the shape of a very handy office ruler and is the only Machine which adds and directly subtracts in £.s.d., feet and inches, fractions and decimals, units to millions.

This Machine is, in principle, exactly the same as machines costing eight to twenty times as much or more, with this exception, you have no keys or levers to project and stick.

If you have a large adding machine, you have not only to carry your ledger, etc., to it, but you must, of necessity, keep one hand on the item in the Book and one hand on the adding machine keys, and if you are called away or your attention distracted, the probability is that you would lose your place.

The Addometer fits on your ledger and follows every item down. When you reach the bottom of the page, your rule is in the correct position to draw your total line, subtract credits, and give you your final total.

By simple turns of the Dials, you can do 99% of all arithmetic problems.

The Addometer has a wide variety of uses in offices, factories, stores and outside jobs. It is simple to operate, easy to handle and convenient to carry.

Think of it! You can give 8 clerks one Addometer each and still spend less money than the cheapest adding machine in the trade.

THE ADDOMETER DOES MORE WORK AT LOWER COST THAN ANY OTHER ADDING MACHINE.

ADDOMETER

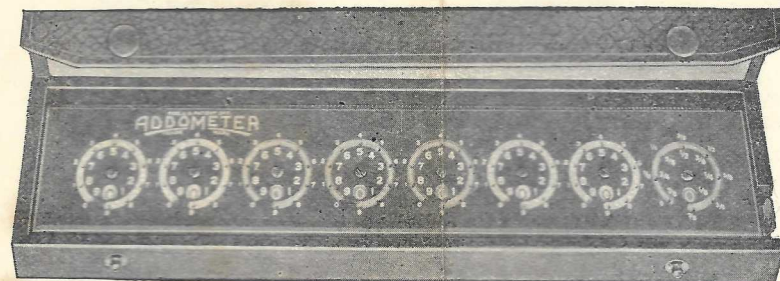

There are 4 Models of the Addometer:—

Model A.—Adapted for use of fractions and decimals. This model has a capacity of 99,999,99 $\frac{1}{4}$

Model B.—Standard Decimal Model. Capacity 999,999-99. Suitable for political agents for calculation of voting strength.

Model C (Lineal).—Adapted for use in feet, inches and fractions. This is a particularly valuable model for the use of architects, contractors, engineers, and other vocations where the computation of various measurements is required. It has a capacity of 999,999 feet 11 $\frac{1}{4}$ inches.

Model F.—English Currency Model. Capacity £9,999 19s. 11 $\frac{1}{4}$ d Rule scale in inches.

(Price £3)

At the price quoted the Addometer is the outstanding adding machine value of the world. A demonstration will prove a revelation—you will not be urged to buy.

GUARANTEE.

Every Addometer is guaranteed to be perfect, both mechanically and in appearance when delivered. Should any defect **due** to faulty workmanship or materials develop at any time within **12 months**, after its purchase we agree to repair or replace it with a new Machine without charge to the purchaser on delivery of the defective machine to us. This is more than the Guarantee given with much more expensive machines.

Additional
Addometer
Advantages.

- 1.—Handles any combination of eight figures.
- 2.—Operates quickly, simply and easily.
- 3.—Shows clearly result of every operation without key pushing or lever pulling.
- 4.—Does direct subtraction.
- 5.—Clears instantly. Every dial can be sent to zero with single lever pull.
- 6.—Carries handy rules—11" long.
- 7.—Can be operated without moving from case.
- 8.—Light and compact—can be carried easily in pocket to work anywhere.
- 9.—Can be placed directly over the figures being used and can be easily moved, guiding eye to proper figure always.
- 10.—Costs from 1-8th to 1-20th of standard computing machines—and worth many times its cost.
- 11.—Totals always visible—they can be carried indefinitely and additional figuring can be done as occasion requires.
- 12.—Can be used where small space does not permit of larger machines.
- 13.—Simple in design and construction—no complications in operation.
- 14.—Made entirely of hardened metal—will last a lifetime.
- 15.—YOU CAN'T MAKE A MISTAKE IF YOU BUY IT AND YOU CAN'T MAKE A MISTAKE WHEN YOU OPERATE IT!
