S·A·M·S
ATTENDANCE MONITORING SYSTEM

HARVESTER INFORMATION SYSTEMS

SAMS THE TIME MONITORING SYSTEM THAT WILL NEVER BE OUT-OF-DATE.

WHAT IS SAMS?

SAMS is the world's leading Staff Attendance Monitoring System – a way of keeping control of who's doing what, where, and when!

It's an extremely powerful system that can give you reports in over 16,000 different formats and that can dispense with timesheets and costly manual recording.

The basic hardware of SAMS is a miniaturised computer, the Psion Organiser II, attached to a card-reader.

The individuals concerned are issued plastic cards – just like a credit-card.

As they come through a door or past a reception they run their cards through the card-reader and SAMS does the rest.

These cards are supplied by Harvester and can be customised to your own requirements and even include a photo of the individual user if required.

As soon as their card is run through the card-reader the system records who they are and the time.

**THE COMPLETE SYSTEM FOR A SINGLE SITE –
OR A KEY ELEMENT IN A MULTI-SITE NETWORK**

WHO NEEDS SAMS?

Anybody with more than a handful of staff:

Accountants	Hospitals
Agriculture	Hostels
Airlines	Hotels
Architects	Insurance Brokers
Army	Jewellers
Associations	Kitchens
Bands	Leisure centres
Banks	Libraries
Builders	Life Insurance Companies
Building Societies	Local Authorities
Business Consultants	Manufacturing
Butchers	Markets
Cafes	Navy
Car hire	Nursing homes
Car parks	Off-licences
Catering	Offices
Chemists	Oil refineries
Clinics	Out-door situations
Clubs	Overseas locations
Colleges	Plant hire
Construction	Police Forces
Consulting Engineers	Post Offices
Contractors	Power stations
Conventions	Printers
Courier services	Public houses
Courts	Quantity Surveyors
Department stores	Radio stations
Drawing offices	Schools
Education	Security
Electricity Boards	Shops
Employment Agencies	Shows
Engineering	Sports centres
Entertainment centres	Staff Agencies
Estate Agents	Studios
Exhibitions	Supermarkets
Factories	Television producers
Film Production	Traders
Gas Boards	Travel Agents
Government offices	Universities
Hairdressers	Watchmen
Harbour Authorities	Wine bars
Health Centres	Zoos

WHAT DOES SAMS DO?

The basic system assumes that the first swipe in a day is the person coming in, the next going out, and so on.

There are three levels of access to the system. Level one is general access and is open to all. At this level anyone can key in an individual's name and find out whether they're in or out, on holiday, out-of-town or sick. At level two, which can be password protected, the personnel or wages department can access and hold information on rates of pay, agreed working hours, holidays etc.

At the top level of access, again password protected, management can use the system to generate reports in practically any format: by individual, for any day, week, month or year; by department for any hour or period across specific grades; by cost in the same number of permutations; and the system provides for almost any kind of shift pattern, flexitime working or working week type.

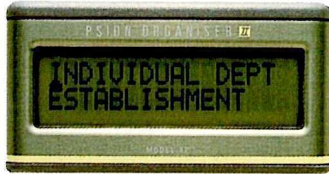

HOW IT WORKS

Whenever you want an up-to-date report you collect the datapaks from the Organiser – if there's more than one, merge them, and then transfer the data onto a PC for processing and printing.

The Psion Organiser can of course handle all the calculations itself and either output them to its own screen or a printer.

If you have secure areas the system can also be linked to security door-locks.

BENEFITS

SAMS is unique, there is no comparable system on the market, no other product even approaches the versatility of the Harvester system, over 16,000 different reports are available at the touch of a few buttons, and SAMS can be configured to almost any timekeeping scheme you may have in operation.

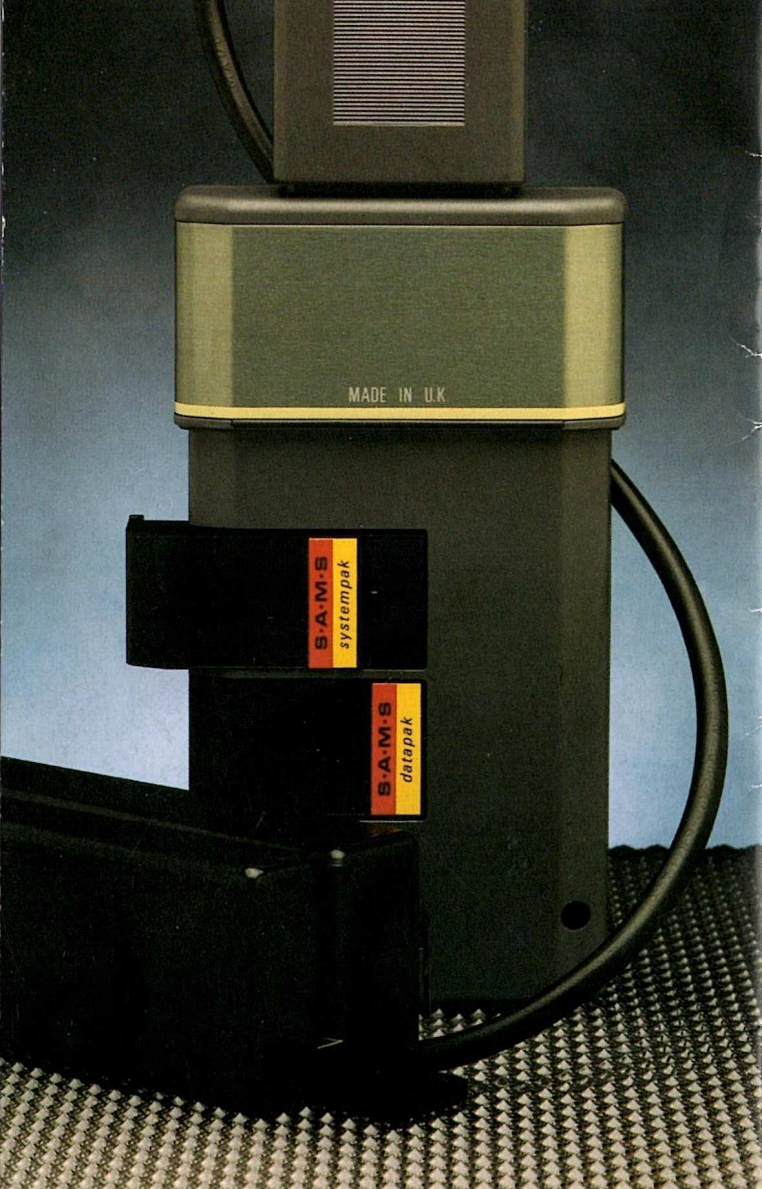

It will tell you how many hours an individual, or a group, or a department, or even the whole company has worked – in a day or week or month or any period you choose. It can focus on weekends, lunches or shifts. It can project into the future and tell you how many man hours you will have available or what costs you will incur, taking into account staff holidays or shutdowns.

It can automatically cost all these timings and deliver the costing to you totalled or sub-totalled in virtually any way you like.

For any business which needs to know how people are managing their time SAMS can provide immediate cost saving benefits...and the reports produced will be invaluable in management planning and costing.

SAMS from Harvester provides incomparable data for man-management and project control in an ultra-compact, easily installed system making it the only choice in Staff Attendance Monitoring ...

SAMS from Harvester Information Systems!

Offer

HARVESTER UPGRADE FACILITY

Congratulations on your wise decision to purchase a Harvester Product for your Psion Organiser II. The program which you have just purchased is one of three extremely useful tools for the Organiser which are produced by Harvester and which have been installed on to just one datapak for maximum convenience, THE HARVESTER SUPERCHIP!

The best selling, incredible value for money programs on the SUPERCHIP are

THE LETTER ORGANISER – Pocket Word Processor

THE INFORMED ORGANISER – ‘Smartest’ address book yet + Toolkit for datapak and file management.

THE DATA ORGANISER – Create and manipulate data files for everything you need, quickly and easily. Many powerful functions.

You may not require all three programs at this time, but if you do the Harvester Superchip is normally available from your Psion stockist, or, in case of difficulty, direct from ourselves.

However, if you own any of the three programs already on the Superchip and you wish to upgrade to the SUPERCHIP here is what you do:

Return one Harvester Datapak together with £69.90

or

Return two Harvester Datapaks together with £34.95

Your new Harvester Superchip will be sent to you, normally within 7 days.

THIS UPGRADE OFFER IS ONLY AVAILABLE DIRECT FROM HARVESTER INFORMATION SYSTEMS LTD.

PRE PROGRAMMED DATAPAKS FOR THE PSION ORGANISER II

Harvester software provides an outstanding range of very useful programmes which considerably enhance the appeal of the Psion Organiser. They are all designed to be easy to use and come supplied with clear, understandable documentation.

The software is provided on Datapaks which may later be reformatted to provide blank Datapaks. When the cost of the Datapaks is taken into consideration, the price of the software is so reasonable that every Organiser purchaser should not hesitate to purchase the complete range of packages.

THE FINGER ORGANISER

An absolutely ESSENTIAL package which actually teaches you to use the Organiser keyboard in a lively and enjoyable way. Start at 20 wpm with simple exercises and progress to 40 wpm to become an expert typist. The system is based around using four fingers and can be practised anywhere. The on screen displays record your errors and speed and continually set the user new challenges.

THE LETTER ORGANISER

A pocket word processor with big word processor features. Ideal for composing lists and documents whilst on the move. On a train, plane or where there is too much movement for pen and paper, the Letter Organiser provides confidentiality from casual snooping.

Features include:-

Edit, Directory, Copy, Rename, Display, Block Shift, Word Count, Character Count, Search, Memory Free, File Export, Delete File, Date and Time Stamping, Go to, Paragraph Delete, Character Delete, Password Protect, Variable Scroll Speed.

Documents prepared on the Letter Organiser can be exported into most word processing packages for final polishing or can be printed out directly via the Comms Link option.

The Psion Organiser II and the Letter Organiser combine to make what is perhaps the worlds smallest word processor.

THE DATA ORGANISER

Probably the best hand held database available, the Data Organiser makes the most of the Organisers amazing power and allows the creation of files limited only by the size of a Datapak capacity. The structure can be set up almost as quickly as you can type it in with a maximum of sixteen fields and 238 characters per record. Each field effectively becomes a key field allowing instant retrieval of any information.

Each Field is named and may be designated:-

String, Number, Integer, Telephone (auto number default) or Lower case default.

Files may be searched on up to eight criteria in addition to sorting into ascending and descending order either alphabetically or numerically on any field.

Printing may be direct via the Comms link to a suitable RS232 serial printer and includes control to print the whole file or just selected records. User defined reports provide control over fields to be printed.

Specific features include:-

Go to First, Last or Selected Record, Help, Order, Print, Display, Copy File, Delete File, File Size, Rename File, Directory, Search, Datapak Memory, RAM Free, Set Scroll Speed, Edit Data, Edit Structure.

The Data Organiser sets new standards in ease of use with almost total manipulation of all data. Your imagination is the only restriction on its versatility.

THE INFORMED ORGANISER

Includes Address Organiser, Toolkit and Tester.

ADDRESS ORGANISER – gives menu driven prompts to make sure all your information is stored in a uniform manner. The two user defined categories allow information to be retrieved by group, e.g. private or

business, or you could select by travel agents, florists or electrical suppliers etc. Sorts alphabetically on either surname or company name. Simple to use print procedures print four different types of label or lists. Comprehensive range of Find, Edit, Copy etc commands.

Fields are: Surname
First Names
Title
Phone
Company
Four lines of address
Car Phone
Telex
Fax
Category A)
Category B) User Defined

TOOLKIT – unlocks the power of the Organiser Programming Language for file and Datapak management. Simple 'one press' menu commands give:-

View data in any file with search, go to first/last or selected record, file size etc
Space free in each datapak and RAM
Data file directory
Copy, rename or delete files
Set scroll speed and sound on/off.

TESTER – the fun feature, a keyboard Dexterity Tester that lets you know how you rate as an Organiser user.

THE HARVESTER SUPERCHIP

Contains the Data Organiser, Informed Organiser and Letter Organiser on a single datapak with an optional sub menu to allow the retrieval of any of the programs.

Sold as a separate product, the superchip is also available from Harvester as an upgrade to existing owners of Letter, Data and Informed Organisers.
