FILE HANDLING.

OBASE by Transform Ltd.

Obase allows you to create databases on your Organiser II. Files can be created with field types i.e. text, numeric U.K date, U.S.A. date, time and barcode number. Each field also has a field name. Printer formats can be set up including printing on Fax paper and labels. Data from this program can be sent to, or received from Dbase or Archive.

FILEMASTER by Widget Software

This versatile database manipulator now includes many more features. SORT into ascending, descending, alphabetic or numeric order- using up to 2 keys. SEARCH, SELECT and PRINT now allow complex conditional statements. PRINT in columns, on labels, or selectively with the layout that you want. User created field prompts on input and display. VU the high level command which allows creation and effortless viewing and editing of upto 110 database files.

FILEMASTER DEVELOPER by Widget Software

Filemaster brings added power and depth to the Organiser II. The Developer Version brings the same powerful features to the Organiser Emulator. To run the Filemaster Developer, you must have the Psion Organiser Developer. On its own, the Emulator cannot display the contents or even confirm the existence of files created by your programs. Using the Filemaster Developer Version you can create, list, view and edit test files, just like Filemaster.

XBASE by Cubsoft. (comprising of four programs).

MBASE is a versatile user friendly database, memory resident, ideal for day to day enquiries. XBASE 'state of the art' database, powerful fast sort routines sort data 'on the fly' which you can view, print or copy to file. Columnar print for Epson and Psion printers in a variety of formats or page widths. ODIARY is a new way to navigate the diary quickly; reschedule appointments; block book a series of meetings. MIN-KEY, simplified FNKEY-12 function keys, punctuation marks and £ sign.

DATA ORGANISER by Harvester.

The Data Organiser makes the most of the Organisers amazing power, it allows the creation of files limited only by datapak capacity. The structure can be set up almost as quickly as you can type it in with a maximum of sixteen fields and 238 characters per record. Files may be searched on up to eight criteria in addition to sorting into ascending and descending order either alphabetically or numerically on any field. Printing user defined reports gives control over fields to be printed.

FINANCE.

BANK/CASH ACCOUNT by Transform Ltd.

This program allows you to keep records of an unlimited number of bank accounts per datapak. Features include monthly, bi-monthly, quarterly and annual analysis both on screen and to printer, bank details include bank manager, phone number, account number etc. Money can be transferred between both cash and bank accounts, all accounts can be analysed under user defined codes, cash accounts handle expenses and VAT.

PERSONAL FINANCE by Willow Enterprises Ltd.

Manage your bank accounts, credit cards and shares. Know at any time the balance and availability of accounts, date and amount of outstanding transactions, value and performance of a portfolio of shares, standing order details, printed statements. Personal finance also saves you money: Never pay credit card interest with excess funds in other accounts, quickly identify discrepancies on statements. Or when to sell shares based on performance.

FINANCE. ▶

PERSONAL FINANCE II by Willow Enterprises Ltd.

A new release of Personal Finance written specifically for the LZ and LZ64. It has all the features of the original and is data compatible with it. New features include: full 4 line displays, increased numbers of accounts and shares, monitors cheque numbers, backup and restore options, records historic data on paks, rampak storage option, search facilities and enhanced standing orders.

FINANCE PAK by PSION.

Finance Pak contains programs designed to solve complex financial calculations, while also keeping track of your expenses, bank accounts and the facility to print statements. It calculates discounted cash flows (DCF); Internal Rate of Return (IRR); APR; mortgage interest; for a series of fixed periodic payments it will solve compound interest rate, payment amount, future value, present value or period, giving flexibility when calculating annuities, or loans. LZ versions now available.

BOOKMATE by Comtec.

Bookmate is a rapid and easy to use expenditure tracking system. Including expenditure payments, expenditure invoices, income, five bank accounts and a cash account, trial balance & profit and loss, reports, consolidation and configuration (PIN numbers, printer defaults etc.). There is also an option for programmers to write their own program called Custom. This facility could be used if a user wants to send the file to a PC to be used by a PC application.

LACE

LACE stands for Log, Action List, Credit Card, Expenses. Log provides a means for logging events. Action list manager keeps a list of actions to be carried out with priority and status information attached. Credit Card Account Manager stores description, date of transaction, category of transaction, amount of transaction and account name. Expense manager is designed to keep an account of expenses incurred by you on behalf of your firm or business.

BAR CODES. ▶

BARCODE PRINTER 1 by Gaascom Ltd.

Barcode printer 1 enables barcode printing to be done with or without a PC. Only a good quality dot matrix printer, or better, is required to print the most commonly used barcodes. EAN 8, EAN 13, UPC 8, UPC 12, Code 39 and 2/5 Interleaved (ITF). The pack has an advanced barcode reading program BARTEST which reads the barcode, telling you the type, country of origin for EAN and UPC, or for books reports "EAN books (ISBN)".

ANTETA by Advanced New Technology.

Anteta is designed to allow the "non-expert" to gain the benefits of data collection using bar coded data input, without the expense or problems normally associated with other systems. You can select a combination of keyboard and barcode inputs needed for an application. You can also customise the screen prompts. Entries are stored with the date, time and person who made the entry. Using a Comms Link data can be sent to another computer for processing.

ANTLAB by Advanced New Technology.

With ANTLAB you can make your own barcode labels. It generates alpha-numeric "code 39" barcodes using an IBM PC (or compatible) and dot matrix printer. Labels can be printed with repeating or sequential barcodes with a label title of your choice; copies of the same label can be printed. In sequential mode, it makes a series of barcodes between selected start & stop numbers. An alpha-numeric prefix and/or suffix can be added to the barcoded number.

BAR CODES. ▶

BARLAB by Advanced New Technology.

BARLAB has all the features of ANTLAB but the only thing required is the Psion Organiser XP or Pos-Alpha, a Psion Comms Link and an Epson compatible printer. BARLAB is ideal for printing low cost barcodes in situations where on the spot barcodes are needed, but there is no full computer system - in stores, for instance.

ANTETABASE by Advanced New Technology.

This system is an ANTETA plus it contains a database. This database can be input directly or transferred from a PC. When a barcode is read, the database is searched and the two description details for the item are displayed on the Organiser.

ANTLABFILE by Advanced New Technology.

This is an ideal low cost barcode label printing package for an IBM PC, to compliment the Organiser bar code reading systems. Prints Code 39 barcodes and the user has full control of label width, height etc.

BARSTAR by Codeway Systems

Barstar is a PC memory resident program that allows the user to print code 39 barcodes, each bar code is a minimum of 2 lines deep and a maximum 6 bar codes can be printed across the page. You can use any database program, all you need to do is surround the number you want printed with |. Barstar converts any data sent to the printer within the | into code 39 barcodes. Please specify if you have an Epson or Hewlett Packard laser jet compatible printer.

BARCODE PRINTING by Transform Ltd

This is a menu based program for the PC that allows the user to simply type in a number and print a code 39 barcode. The user can specify the height of text printed above or below and the number of copies.

SHARES. ▶

SHARETRACKER by Round Two Computer Products.

Sharetracker stores all BUY, SELL and DIVIDEND information for stock market investors. It tracks 2 user definable moving averages in order to calculate BUY, SELL and HOLD recommendations and computes rate of change indicators. What this means is that by updating the latest prices of the users portfolio on a daily or weekly basis the system will recommend when to buy, sell or hold shares and also produce itemised statements, profit and loss reports etc.

PORTFOLIO by Dip Ltd.

Created for the private investor, Portfolio enables the recording of all share, unit trust, gilt and bond investments, the updating of prices and the buying and selling of holdings. It maintains a summary of the entire portfolio value, cash account totals, dividends received and brokers costs; 'flags' shares that deviate beyond preset high/low prices; estimates the current capital gain of an entire portfolio and allows the complete record to be printed.

.....Organiser linked PC Stock Control and PC Mail List available

STOCK CONTROL

STOCK CONTROL by Transform Ltd.

Our Stock Control Program Stores the following details, stock number, bar code number or reference, quantity, buying price, selling price and description. The bar code reader can be used to search quickly for a stock item or you can search using stock number or description. Total option allows you to total quickly the value of stock. Data can easily be transferred to and from Transform's PC Stock control program.

STOCK CONTROL MOVEMENTS by Transform Ltd.

All the functions of the original Stock control but the movements part contains quantity, sales or delivery, stock number, price, tax rate and date. Can also be used with a printer to print sales receipts, which includes a list of the items sold together with the VAT rate. This program can be used with the Bar Code reader to find stock items. Both stock control programs are compatible with the Psion printer.

TRAVEL

TRAVEL PACK by Organized Solutions Ltd.

Travel Pack is the ultimate information Database for anybody who travels. It provides a translation dictionary with over 700 useful and essential words and phrases translated between English, French, German, Spanish and Italian; international telephone directory and world clock; currency conversions; weights, measures and clothes sizes conversions, trip itinerary and password protected data. It also records expenses with a running total and can print a full statement.

ANTernational Traveller by Advanced New Technology.

Every time you travel, update the city details (or country if you wish) with data for car hire, hotel, contact details etc. Keep important details of credit cards, emergency numbers, passport and insurance on hand. Stores details of ones Doctor, birthdays, blood group etc. Keep a data bank of all currencies and exchange rates, convert from any currency into another. Easily check the time in any city you have on record. Tell the Organiser where you want the data to be stored.

WORD PROCESSING

AUTOSCRIBE PLUS by Widget Software Ltd.

Creates letters and reports of any length, with functions you would expect from a PC based system. Features include word wrap, cut and paste, autosave, format control, special characters, list, search and replace, print (with bold, underline, italics, large or condensed print wherever you require), or transmit text to or from a PC.

LETTER ORGANISER by Harvester.

A Word processor ideal for composing lists and documents whilst on the move. It provides confidentiality from casual snooping. Full editing commands include Edit, Copy, Block Shift, Word count, Character count. Documents can be exported to the PC or printed direct from the Organiser.

JOTTER by Camel Systems Ltd.

Jotter caters for all your word processing and information storage needs. You can write letters, notes, invoices etc. Jotter has the facilities of word processors many times its size and cost. Split, merge and delete lines, search, cut, paste, underline, centre etc.

TELEPHONE

TELLOG by Advanced New Technology.

When you make a phone call, TELLOG calculates and shows the cost of your call as it is made. A Special incremental display feature allows calls to be ended before another unit is used. This alone could save you money. TELLOG records the date, time duration, destination and cost of the call. It allows access to your Organiser database containing your phone numbers; it is also equipped with its own database for you to place personal numbers and area codes.

MATHEMATICAL

MATHS PAK by Psion

The fast and easy solution to your mathematical and statistical requirements, the Maths Pak provides a number of powerful programs. The powerful way to solve first and second order Bessel functions, Trigonometrical functions, Quadratics, Newton and Linear equations, Eigen values, Matrices up to n dimensions, polynomials, integration under a curve, along with a whole host of statistical functions such as Chi-squared confidence levels.

FORMULATOR by Psion.

A Powerful and flexible tool for dealing with formulae for businessmen, scientists, engineers and other professionals. It accepts formulae just as you would write them, prompts for numeric values and displays the results. Formulae can be saved, retrieved for repeated use and combined to form complex related equations. With over 250 formulae and conversions to handle solutions from simple VAT calculations to advanced mathematics and engineering.

SPREADSHEET by Psion

The pocket spreadsheet boasts a grid size of 99 rows by 26 columns, variable display formats to make the most of the screen, transfers worksheets to and from PC's; 12 digit accuracy. full grid format and manipulation commands; worksheets can be saved in an encrypted form with password access only; full range of scientific and business functions. Compatibility with Lotus 123* is provided with WKS and WK1 file formats.

TIME LOGGING

TIME BASE by Transform Ltd.

If you have to keep a track of time whether it be at work or play this program is for you. For solicitors of accountants who want to record time spent on contracts, servicemen who have to fill in time sheets, phone callers, time and motion studies through to joggers who want to monitor their progress. Program prints a complete log of times or invoice, if used for contract work.

SPECIALIST

MINI TILL by Advanced New Technology.

Simple stock taking system for small shops, garages etc. Upto 300 product lines can be used on the system and stock and sales details can be displayed/printed. Supplied as a program pak with manual.

.....If you want to connect a Cash Till to the Organiser ring Transform on 01-462 4666

SPECIALIST.

ANGLER by DMT Associates

Angler records details of catches for fly, course or sea fishing. Weather, water tidal conditions and other details can be searched for the best catch during any period..

**PROJECT MANAGER** by Advanced New Technology.

Project Manager is powerful task, time and cost analysis software package for the Organiser. It allows customers, projects and tasks to be setup, edited and deleted. Tasks can be given a cost rate per hour, giving automatic costing. It records date and time of activities, the customer, project and time that was spent on an activity. It records the cost rate in the time a task was performed. It allows direct expenditure to be included in the overall cost of a project. Car mileage can be entered with a mileage rate.

**FILO-ANT Notepad** by Advanced New Technology.

Filo-Ant allows you to store all your notes without getting them mixed up in the MAIN directory. e.g. Say you wish to store important notes. Simply key in "URGENT" and "URGENT" appears as a normal menu option. Select "URGENT" and you can add your urgent notes in a notepad created for them. Do the same for Birthdays, Jobs, House, Shares, Money etc. and save your data in the correct notepad - thus keeping it even more organised than ever.

**MAGETA** by Advanced New Technology.

MAGETA lets you gain the benefits of data collection by means of the ever popular plastic card without the problems some other units have. Each entry is stored with date, time and who made the entry. Typically 500 entries can be stored before downloading or deletion is necessary, although this can vary. Data can be viewed on the units own screen, printed out or transferred to another computer. Thus MAGETA can be used stand alone or as part of another system.

**PROMPT MASTER** by Langdale Systems Ltd.

Prompt Master is invaluable for anyone making presentations or speeches. Not only does it replace prompt cards it automatically compares how far you are into the talk with the amount of time you've used. Prompts are prepared on a PC and downloaded to the Psion via the comms link where they are presented as three line prompts. Presentations can be stored and edited for re-use.

**QUESTION MASTER** by Langdale Systems Ltd.

Question Master is designed to speed up and increase the accuracy of interviewing. Questionnaires are prepared on a PC and transferred to the Organiser via the Comms link. Questions are set to accept multiple choice answers, text or fixed field and have a "goto" option for each answer, thereby omitting any questions rendered unnecessary by a previous answer. Answers are analysed on the PC using a standard database.

NAVIGATION SOFTWARE by Maritek.

Comprehensive passage planning, navigation and analysis. Unlimited waypoints, 24 routes, computation of speeds, distances, bearings etc. taking deviation, variation, leeway and tides into account. All entries are stored in a log and can be saved, analysed and printed. Tidal Height computed any day/time at over 400 locations. Time of high/low water, ranges, dates of springs and neaps. Astro navigation from Sun, Moon, stars or planets. Built in Sun almanac. Contact Transform Ltd to obtain further details.

**GOLFER** by DMT Associates

Records golf scores, for any course, weather conditions, handicaps. Reports the best net, gross and par scores for any combination of conditions. Also holds the pars, distances and comments on courses.

SPECIALIST.

FORM MASTER by Cascade Games Ltd.

FORM MASTER is by far the most accurate Race Form Predictor System on the market today. Over the last five years it has consistently produced a high percentage of winners and outstanding profits. It is tried, tested and proven. Form Master is the first true knowledge based expert system for racing. Now you don't need to be an expert to pick winners. All you have to do is enter easily available data and Form Master does all the work for you.

OTHER SPECIALIST PRODUCTS.

Other products available are a fire appliance control package, factory equipment safety control, asset checking, perpetual inventory checking system and material control system. Contact Transform Ltd to obtain further information.

GENERAL.

MAIL LIST by Transform Ltd.

You can now store details on your Organiser and print directly onto labels, or download your data to a PC compatible program. Each record includes Name, Telephone number, Address, Town, County, Post Code, country, Account number, contact, details, reference, telex and fax number. The file can be ordered under name and data can be transferred to and from Transforms PC Mail List program.

**ORGANISER TO DBASE/ARCHIVE** by Transform.

(Two separate products). Once you have transferred your Organiser file to the PC using the Comms Link. This piece of software allows you to convert your Organiser file to be read directly as a DBase II*, DBase III*, DBase III +* or Archive database file (please specify which one you have before purchasing). Once on the PC, it allows you alter the existing structure of your database and transfer it back to the Organiser e.g. shift around the order of the fields.

**DEVELOPER** by PSION

An Invaluable tool for writing programs for the Organiser. Supplied on a 5 1/4' disk for the IBM PC and compatibles, you can create, test and debug your OPL procedures on a PC before transferring to the Organiser. Full screen editor includes 2 buffers, cut/paste and search. Powerful debugger allowing single stepping, tracing, watching variables and more. Creates and saves datapaks files and transfers them to and from the Organiser via the Comms Link.

**SPELLING CHECKER** by PSION

The Concise Oxford Spelling Checker provides an instant check on the spelling of over 24,000 carefully chosen words. Drawn from the Concise Oxford Dictionary, the words have been shown by office studies to be the most commonly misspelt. As easy to use as a simple dictionary, just type in the first three or more letters to define the word and the Psion Organiser II will immediately display the correct spelling on the second line of the screen.

**FNKEY** by Cubsoft.

Powerful memory resident keyboard macro utility with cut and paste. Assign commonly used key sequences to function keys (26 expandable to 676). Replay in just two key presses - quick and accurate for repetitive tasks. Easy access to mixed upper and lower case letters and punctuation marks. £ sign, date and time stamping, cut and paste words, phrases or lines - ideal for OPL programming and moving lines of code. Save definitions to datapak. Works with all models of the Organiser.

GENERAL

FINGER ORGANISER by Harvester

An absolutely ESSENTIAL package which actually teaches you to use the Organiser keyboard in a lively and enjoyable way. Start at 20 wpm with simple exercises and progress to 40wpm to become an expert typist. The system is based around using four fingers and can be practised anywhere. The on screen displays record your errors and speed and continually set the user new challenges.

INFORMED ORGANISER by Harvester.

Informed Organiser comprises of Address Organiser which gives menu driven prompts to make sure all your information is stored in a uniform manner. This information can be selected by group e.g. private or business, or selected by travel agents, florists etc. Sorts alphabetically on either surname or company name. Toolkit unlocks the power of the Organiser Programming language for file and datapak management. Tester is a keyboard dexterity tester that lets you know how you rate as an Organiser User.

HARVESTER SUPERCHIP by Harvester.

Contains the Data Organiser, Informed Organiser and Letter Organiser on a single datapak with an optional sub menu to allow the retrieval of any of the programs.

DIARY LINK by Psion

Diary Link enables the transfer of Organiser diaries, using the Comms Link, to IBM PC compatible computers, for printing, editing or simply to archive on disk rather than on datapak. Diary Link also merges Organiser diaries with Sidekick diaries, automatically updating both diaries and highlighting any conflicts. Diary Link is supplied on a 5 1/4" disk.

BACK IT UP by Yellow Computing.

An advanced backup program for your Organiser, which saves your data at the press of a button. Back It Up copies the files, dates, alarm settings, and OPL programs in your Organiser onto a floppy or hard disk. Dispel your worries about losing all your valuable information. Restore all your saved files with a single tap on the keyboard. Comes complete with comprehensive manual, 5 1/4" and 3 1/2" disks.

TRANSFILE ST by Yellow Computing.

Attention all Atari ST/Organiser owners - here is the program which makes data transmission via the Comms Link easy and rapid. Uses Psion protocol to ensure error-free transmission in both directions. Transmits and receives all data files, diary files, notepads and OPL programs. LPRINT emulation allows Organiser to print through the Atari to a printer. Works with all Organiser II models. Comes complete with comprehensive manual and 3 1/2" disk.

BACCHUS by DMT Associates.

Complete stock and sales control for the Beverage industry. Produces full printouts including GPM, discrepancies, turnover, profits, re-order levels, stock levels, etc.

.....For Information on Psion's new product range ring 01- 462 4666

ACCESSORIES

PSION COMMS LINK (RS232) by Psion.

This connects the Organiser to printers, computers, modems and any RS232 standard devices (adaptor may be required). Menu driven software is built into the Comms Link, and a disk of software for IBM PC compatibles is included (Apple Macintosh version available). Allows bi-directional transfer of files between the Organiser and a PC. Totally controllable from within OPL programming language, supplied with 25 pin "D" type plug (adaptors available).

**ORGANISER CENTRONICS INTERFACE.**

This interface allows you to print directly to most Centronics (Parallel) printers. Plug this interface into the end of your Comms Link and it converts the RS232 connection into a centronics one. Requiring very little setup it is controlled from the normal Comms Link menu.

**PARALINK** from Widget Software Ltd.

Print direct from Organiser to any parallel printer. This powerful add-on slots into the top of your Organiser, while the lead end plugs into your printers parallel port. No Baud rate or parity settings required. Print software is made memory resident (uses under 1200 bytes), leaving datapak slots free. Compatible with 99% of parallel printers, and most available programs with a print routine. Print routines integratable with your own software.

BAR CODE READER by Psion.

The Bar code reader consists of a contact bar code wand attached to an interface which plugs into the top of the Organiser. It contains the control and discrimination software and adds an additional (BAR\$;) function in the Organiser language OPL. This enables bar codes to be read and converted into alpha and numeric characters. Bars are read at 3-30 inches per second and the following standard codes can be interpreted; EAN, UPC, CODE 39, ITF, CODABAR, TELEPEN, PLESSEY, MODIFIED PLESSEY AND

MAGNETIC CARD SWIPE by Psion.

The magnetic swipe is attached to an interface which plugs into the top of the Organiser. Installation of the magnetic swipe reader is similar to that of the barcode reader, giving the user a (SWIPE#;) function in OPL. The user can program the Organiser to do specific card reading applications in OPL, by specifying the parity of the cards to be read and time out delay to be imposed. The card reader is suitable for use with most popular odd and even bit parity cards, reading up to 37 characters from track 2.

**ERASER 16** by Psion

The Eraser 16 can erase (format) up to 16 Datapaks at a time. 2 rows of 8 slots in the top of the Eraser 16 hold the Datapaks in position to ensure maximum exposure to the ultra-violet light. The lid contains a safety interlock which automatically cuts out the system when opened. The erasing process is controlled via a variable electronic timer and takes between ten and thirty minutes to erase 16 datapaks. An audible alarm and pilot lamp informs the user when the eraser cycle has been completed.

FORMATTER by Psion.

This works on the same principal as the Eraser 16 - formatting Datapaks for repeated use through exposure to ultra-violet light, but is designed for individual users as opposed to large volume applications. The formatter has the capacity to format two Datapaks at a time, and takes approximately thirty minutes to complete the process. Formatters are fitted with safety inter-lock mechanisms and pilot lights which indicate completion of the formatting cycle.

.....Contact Transform for information on connecting modems to the Psion Organiser.

ACCESSORIES.

MARK III COPIER by Psion.

The Mark III Copier has a multitude of functions. It can copy a datapak onto up to eight other datapaks simultaneously. It can communicate in serial or parallel mode with IBM PC's (or compatibles), thereby offering a fast and effective method of directly transferring data in both directions between the PC and up to eight datapaks at a time, each one independently addressable. The Mark III copier can work at about ten times the speed of the Comms Link, on user-selected files or large quantities of data.

MAINS ADAPTOR by Psion.

The Mains Adaptor (AC) powers the Organiser. Useful when communicating with other devices, or when saving large amounts of data. Does not recharge batteries.

HIGH DENSITY BAR CODE READER.

This version of the Bar code reader reads any high density barcodes. It also has an on/off switch replacing the push button switch.

BATTERY BACK UPS by Advanced New Technology.

There are three versions of this unit, the first is a simple rechargeable power backup unit. Just plug it into the top of your Organiser when the 'Battery Low' message appears and your data is safe. The second replaces the existing battery compartment and recharges when the Mains adaptor is plugged in. The third lasts for 5 hours of arduous duty using a barcode reader for example). After four hours it shows a warning light.

BOOKS.

ORGANISER USER BOOK by Mike Shaw.

"Using and Programming the Organiser II" by Mike Shaw. This clearly written book can be read with benefit by the expert and uninitiated alike. It takes the reader through the operation of the Organiser and the principles behind a computer. It then leads you into programming and the thrill of writing programs and seeing them work! For the more expert user it explores file handling and programming in more depth.

ORGANISER FILE HANDLING by Mike Shaw.

'File Handling and other programs for the Psion Organiser' is a second book by Mike Shaw. This helps the user to program the Organiser to handle their own files, from currency conversions to working out the date of Easter from now until eternity, plus many more useful programs.

MACHINE CODE PROGRAMMING

AND OPL ON THE PSION ORGANISER II.

A brand new book in the series, explaining about Machine Code programming.

..... Transform Ltd can write Organiser programs to your special requirements. To obtain further information ring 01-462 4666.

ACCESSORIES

ORGANISER TRAINING VIDEO.

This 30 minute video is the perfect introduction to your Organiser. It shows you how to use the built in functions of the Organiser like+ inserting the battery, setting the clock, diary, calendar, alarm, sending files to a PC and printer. This video covers both the XP and LZ models of the Psion Organiser.

DMC II DIMENSIONAL MEASURING COMPUTER

The DMC II combines fast and reliable measurement estimation with flexible and user friendly data processing. This allows you to organise your data effectively and efficiently on site. The DMCII offers many different usages, e.g. Internal measurements, difficult vertical and horizontal measurements, immediate area and volume calculations as well as costings bases on your 'own' price structure.

DIGITAL TELEPHONE DIALER DTFM Dialler

This unit, a combination of Top Slot Hardware and software generates the tones used in modern push button 'phones. The software links into your existing databases to allow you to dial any stored number or generate tones in response to a keypress. This allows it to be used with the TSB's SPEEDLINK or Lloyds TELESARE. The DTFM Dialler can be used with ANY phone provided it is connected to a digital exchange.

THE 'RUGGED' ORGANISER.

By Uniform Applied Technology.

Uniform Applied Technology's range of rugged hand held computers and peripherals offers a unique and comprehensive solution to a diverse range of corporate data-handling problems. These computers are tough enough for constant use on the shop floor (the casing is of a high-impact polycarbon construction), ergonomically designed for the non-expert user, and tamper-proof, giving protection against access to programs and data by unauthorised personnel. One model even has a solar panel which can trickle charge the internal nicad battery. It can also be supplied with a multi-function or custom designed keyboard. Contact Transform Ltd for further details on this machine and its peripherals.

TRANSFORM LTD.

Transform Ltd. 7c, Station Approach,
Hayes. Kent BR2 7EQ
